Catalogue of meteorites of the Museum of Earth and Sky of San Giovanni in Persiceto (Bologna, Italy)

ROMANO SERRA
Dipartimento di Fisica e Astronomia, Università di Bologna - Via Irnerio 46 - 40126 Bologna (Italy) - E-mail: romano.serra@unibo.it

Abstract

It is submitted the catalogue of the meteorites collection preserved at the Museum of Earth and Sky of San Giovanni in Persiceto (Bologna province) updated at September 2017.

Keywords: meteorites, catalogue.

Riassunto

Catalogo dei meteoriti del Museo della Terra e del Cielo di San Giovanni in Persiceto (Bologna, Italia).
Viene presentato il catalogo delle di meteoriti conservate presso il Museo del Cielo e della Terra di San Giovanni in Persiceto (provincia di Bologna) aggiornato a settembre 2017.

Parole chiave: meteoriti, catalogo.

Introduction

The Museum of Earth and Sky of San Giovanni in Persiceto, in the province of Bologna, preserve one of the most important collections of meteorites in Italy, obtained by purchases, exchanges and finds by the staff of the Museum. The collection includes more than 925 finds.
The meteorites have been ordered by types, following the scheme proposed by Levi Donati (1996), of which this note represents the update.

The catalogue (Tab. 1) is structured by the classic scheme: Aerolites, Siderolites and Siderites.
The Aerolites are divided into Ordinary Chondrites (groups "H", "L", "LL", "E" and "R" according to its metal contents), Chondrite Carbonaceus (including group "B") and Achondrites.
The Siderolites are divided into Pallasites and Mesosiderites, according to their metal contents.
The Siderites are divided into Hexahedrites, Octahedrites and Ataxites, according to their nickel contents.

Enstatite chondrites							
Name	**State / Country**	**Date of fall or find**	**Class and type**	**N° of frags.**	**Weight (gm)**	**Notes**	**N° Cat.**
Abee	Canada	1952 Jun. 10	E4 brecciated	1	2.0	S	1
Eagle	Nebraska (USA)	Found 1947/1984	EL6	1	0.2	S	2
Happy Canyon	Texas (USA)	Found 1971	E6	1	3.0	S	3
